

SA loudspeakers

spoil yourself

dare to be different

System Audio's very first loudspeakers were greeted with amazement in 1984. An astounded press wrote: "These loudspeakers set new standards." Not just in terms of sound, but in terms of size. Why? Because back then people firmly believed a loudspeaker had to be big and technically complex to be any good. Unlike every other high-quality loudspeaker, our first product was a small, compact unit that delivered a truly massive sound. It was a loudspeaker inspired by a genuine fascination for great sound – not technology. It was a loudspeaker that dared to be different.

the world's best loudspeakers

The story of System Audio starts with the fact that I used to be a musician. And being a musician, I know how music should sound. Back in the early 80's I spent a long time searching for loudspeakers that could accurately reproduce the sound instruments really make when they are played live.

But everything I listened to sounded dull and synthetic. The only thing the manufacturers seemed to compete about was having the best technical data. But for me it was the sound that mattered. If people can't hear the fine details or sense the atmosphere because the reproduction is so poor, how can they ever discover how exciting music can really be?

That's when I decided to build my own loudspeakers. Since then we've come a long way. Today System Audio A/S is a company with a reputation for being at the forefront of loudspeaker innovation. We develop new technology – but not for its own sake. Instead we combine it with radical new ideas to bring you the best loudspeakers in the world.

Ole Witthoft
Founder of System Audio A/S

the radical technology of the SA7K is reflected by its equally radical design

the new standard

The SA7K represents radical innovation. It sets new standards for quality of sound thanks to a construction that dares to break with tradition.

The SA7K is aimed at people who demand a precision of sound that is quite simply extraordinary. It delivers the same overwhelming experience as sitting in front of a live orchestra – something very few ever experience at home in their own living room. The SA7K sets your sound free, revealing its rich detail and nuances, exposing its rhythmic precision, revelling in its panoramic sonority. Every day you'll simply want to hear more.

Technical description

- Cabinet built according to patented principle
- Drive units featuring ground breaking technology
- 2½ way design
- Pressure driven woofer (PDW) system
- Wave-guide tweeter
- Real wood (Maple, Cherry or Black Ash) finish
- Options for bi-wiring/bi-amping

SA loudspeakers will enthrall you with their incredible sound

a different idea about technology

In a world where trends in technology seem to change with the seasons, SA loudspeakers are based on an enduring set of fundamental scientific principles.

Sound is the most important product of any quality sound system. Unlike the rest of the system however, loudspeakers tackle the unique challenge of transforming digital or electronic signals into physical reality. Because they are simply electrons, the signals produced by an amplifier, a DVD or a CD are extremely fast and precise. The sound that comes out of a loudspeaker however, is made by a membrane that moves. The weight of the membrane therefore has an incredible influence on the precision of the sound that a loudspeaker is able to produce.

faster is better

SA loudspeakers are much faster than ordinary loudspeakers because we use smaller and lighter membranes that weigh a quarter of an ordinary piece of paper or less. Compared to what we use, a standard loudspeaker membrane often weighs twice as much. This huge difference greatly increases the quality of the sound we can produce.

light and natural

Light membranes react extremely quickly, revealing a wealth of detail that a heavy membrane would muffle. That's why our bass sounds never rumble, the instruments sound clear and dynamic, and it is easy to understand what people are singing or saying. The result is a more natural experience that makes a big difference on all types of music, as well as film soundtracks.

even distribution of sound

Little loudspeaker membranes react more evenly, producing a more uniform distribution of sound than a big membrane. This means you don't have to sit right in front of your loudspeakers to enjoy the maximum effect. Now the great sound can follow you all around the room.

easy to integrate

SA loudspeakers take into account a room's acoustics. You can use this to your advantage as it means you can place them close to the room's walls. The interaction between the loudspeaker and the amplifier is also important for producing fantastic sound. SA loudspeakers represent only a light load for the amplifier. This allows our loudspeakers to enhance virtually any quality sound system.

the SA2K fills the room with sound – not with loudspeakers

seen from above, you appreciate the cabinet's special design

the best compact loudspeakers we have ever made

The SA2K have a size-to-sound ratio that is truly remarkable. Other compact loudspeakers may have similar physical dimension, but that's where any comparison ends.

The SA2K are made for people with a genuine passion for music – connoisseurs who want to hear every detail and nuance in their favourite tracks, but who only want a compact loudspeaker.

the FS2K stands ensure the SA2K deliver optimal sound quality

SA creates loudspeakers that transcend the ordinary

prepare to be impressed

Just in terms of appearance, the SA1750 is impressive. The tall, slim design and the remarkable finish make it undoubtedly one of the most elegant on the market. The sound is equally stunning.

The SA1750 doesn't resemble an ordinary loudspeaker - and that's the whole idea. This is a genuine high-end loudspeaker made for only one purpose - delivering fantastic sound.

The fact that it also looks great is simply an added bonus. And being only 13 cm wide - equal to a CD - the SA1750 is easy to integrate into any home.

Technical description

- Extremely fast drive units
- Magnetic shielding
- Mechanically stable cabinet
- Vibration-absorbing rubber integrated into the base
- 2½ way d'Appolito design
- Real wood (Maple, Cherry or Black Ash) finish
- Options for bi-wiring/bi-amping

the SA1730 was created to caress the ears. It is also an elegant piece of furniture

sincere respect for quality

SA1730 is a tasteful quality loudspeaker with a discrete appearance. The sound is authoritative and matches every form of music.

Here the same experience and expertise that produced the SA1750 has been poured into a smaller form factor. That's why the SA1730 shares many of the same qualities as its big brother. Both make it a virtue to be different. Instead of complexity we've pursued simplicity. It's compact, not gigantic.

It doesn't differentiate between music and film – it can be used to great advantage for both. The sound is dynamic and natural thanks to the especially powerful drive units with ultra-lightweight membranes.

Technical description

- Extremely fast drive units
- Magnetic shielding

- Real wood (Maple, Cherry or Black Ash) finish
- Options for bi-wiring/bi-amping

the SA1280 can be used with any quality sound system

gorgeous sound from a beautiful piece of furniture

The SA1280 is an elegant floor loudspeaker encased in a genuine wood cabinet. It is ideal for all forms of music or as part of your home cinema system.

The SA1280 is a technological work of art that is both simple and advanced – a unique combination of cutting-edge technology and classic craftsmanship. The cabinets are manufactured in pairs so each individual set has identical grain. The finish is as beautiful as the finest furniture. The SA1280 can be integrated with every quality system on the market and is easy to place in virtually any room with optimal results.

living with sound

SA will enthrall people with brilliant sound.

There are people who use sound as a source of inspiration and spiritual enlightenment. People who are enraptured by the rhapsody of a symphony orchestra. People who bless the blues from Chicago and believe fervently that these are the sounds of salvation. People who crave the way guitar greats can make a Stratocaster talk, cry or sing. They feel at home in the subtle, sublime and swinging art of jazz. They can't resist the blistering tempest of a full-blooded rock orchestra. Or the rarefied tones of baroque. They know intimately every song sung of their favourite vocalist – and treasure every nuance of every note. SA creates loudspeakers for these sorts of people. People like you.

enjoy the best of both worlds. Simple, minimalist design. Powerful, dynamic sound

very powerful very discrete

Only as wide as a CD (13 cm wide), the SA1550 is a truly slim loudspeaker that stands apart from the crowd. It is easy to place in any room and is ideal for both music and home cinema.

The SA1550 is a compact loudspeaker that generates a huge sound. It is perfect for everything from classical music to hard-hitting rock simply because the drive units are able to reproduce both the fine details and the raw energy of any type of music. Full magnetic shielding also means it is superbly suited to your home cinema as the shielding allows the loudspeakers to be placed close to the TV.

an unusual loudspeaker with big sound

expect the unexpected

The SA1530 tends to amaze people. When they see a loudspeaker that is just 13 cm wide (equal to a CD), they simply can't believe the vast, living sound it produces. What better way to enhance your music and your home cinema experience?

The SA1530 is easier to position in a room than any other high-end loudspeaker. Its simple design and slim format allow it to fit in just about anywhere. And with magnetic shielding, you can place it right next to your TV. So don't be misled by its compact dimensions - the SA1530 is an overwhelmingly powerful and precise loudspeaker perfect for all music genres and home cinema systems.

big ideas in compact loudspeakers

In a world full of plastic loudspeakers, SA is exceptional. Our compact loudspeakers deliver an amazing sound experience that far eclipses their physical dimensions. The most important factor for us at SA is the quality of sound our loudspeakers deliver. That's why the only thing a compact loudspeaker from SA has in common with conventional compact loudspeakers is size.

For example, all our compact loudspeakers are finished in genuine wood. They are also prepared for use with specially designed wall and ceiling brackets, as well as floor stands. This simplifies installation and ensures maximum quality.

A complete magnetic shielding of the compact loudspeakers allows you to place them close to sensitive electronic equipment such as your TV or computers.

The majority of our compact loudspeakers are also available in an AV version. This means they are configured for use as a center channel speaker in your home cinema system. The advantage of this is that you can choose loudspeakers with identical sound quality everywhere in your home cinema.

the SA720 – a powerful and compact loudspeaker

modern multifunctionalism

The SA720 is made for a world in motion. It can be placed just about anywhere and used for any purpose that requires a modern high quality loudspeaker.

The SA720 is a powerful and versatile compact loudspeaker that can be used for all sorts of purposes. Enjoy its musicality in connection with a quality sound system, or thrill to the power it can add to your home cinema. The superior quality of sound will let you savour the all forms of music or use the high technical standard to maximize your experience from the newest digital sound formats. The SA720 is also available as a center channel speaker under the name SA720AV.

Options for positioning

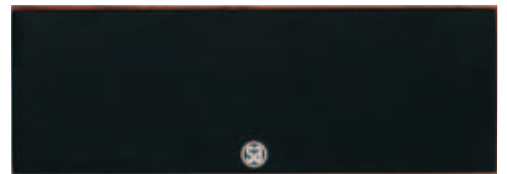

- On the wall with the bracket WB1
- From the ceiling with the bracket CB1
- On the floor with the stand FS1

The SA720 is ideal

- In a sound system for all forms of music
- As a front speaker in a home cinema
- As a center channel speaker in a home cinema (as the SA720AV)
- As the rear speaker in a home cinema
- With an active subwoofer (SE175 or SE200) in a sound system

Technical description

- Extremely fast drive units
- Magnetic shielding
- 2½ way d'Appolito design
- Mechanically stable cabinet
- Real wood (Maple, Cherry or Black Ash) finish
- Options for bi-wiring/bi-amping

the center channel speaker SA720AV is identical to the SA720, but is designed to sit over or under a TV or against the wall

the SA710 is as narrow as a CD

intelligent design

Being only 13 cm wide, the SA710 fits in anywhere. The sound quality far surpasses its physical dimensions and matches all forms of music and home cinema.

The SA710 is a versatile loudspeaker that delivers authentic and precise sound reproduction. Experience the vast sound it can produce from your music system or be captivated by the clear and detailed sound it can deliver from your home cinema to give an incredible and intense experience. Also available as a center channel speaker under the name SA710AV.

Options for positioning

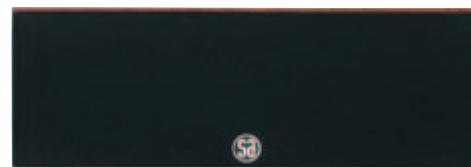

- On the wall with the bracket WB1
- From the ceiling with the bracket CB1
- On the floor with the stand FS1

The SA710 is ideal

- In a sound system for all forms of music
- As a front speaker in a home cinema
- As a center channel speaker in a home cinema (as the SA710AV)
- As the rear speaker in a home cinema
- With an active subwoofer (SE175 or SE200) in a sound system

quality sound in a compact format

magical musicality

The little SA705 creates so much sound of such high quality you might almost believe it was magic. But there is no trickery involved. The secret lies in the advanced acoustics and the meticulous construction of every single loudspeaker. The SA705 is a world away from ordinary compact loudspeakers in every way, except for its size.

Options for positioning

- On the wall with the bracket WB1
- From the ceiling with the bracket CB1
- On the floor with the stand FS1

The SA705 is ideal

- In a sound system for all forms of music
- As a front speaker in a home cinema
- As the rear speaker in a home cinema
- With an active subwoofer (SE175 or SE200) in a sound system

Technical description

- Extremely fast drive units
- Magnetic shielding
- 2 way design
- Mechanically stable cabinet
- Real wood (Maple, Cherry or Black Ash) finish

SA520 – an unusually compact loudspeaker with unusually wide range of applications

powerful multi loudspeakers

The SA520 reflects all of SA's experience and expertise in the construction of compact loudspeakers suitable for both music and film.

The SA520 is a champion in the most demanding discipline for a loudspeaker: reproducing music so it sounds natural, dynamic and alive. The SA520 will surprise you with a quality of sound that greatly exceeds its compact size. The magnetic shielding also makes the SA520 ideal as a powerful center channel speaker for demanding home cinema enthusiasts. (This version is called the SA520AV.)

Options for positioning

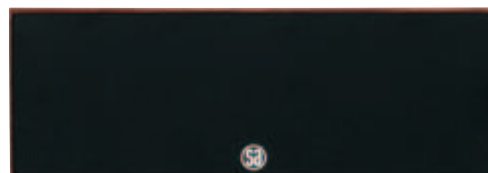

- On the wall with the bracket WB1
- From the ceiling with the bracket CB1
- On the floor with the stand FS1

The SA520 is ideal

- In a sound system for all forms of music
- As a front speaker in a home cinema
- As a center channel speaker in a home cinema (as the SA520AV)
- As the rear speaker in a home cinema
- With an active subwoofer (SE175 or SE200) in a sound system

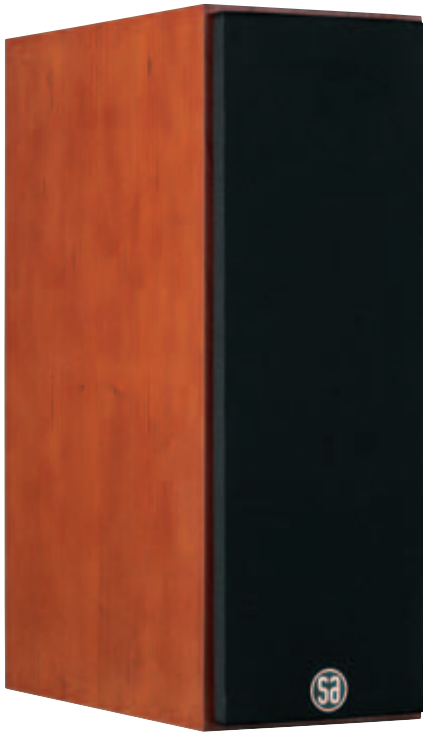

Technical description

- 2 way d'Appolito design
- Mechanically stable cabinet
- Real wood (Maple, Cherry or Black Ash) finish
- Options for bi-wiring/bi-amping

the center channel speaker SA520AV is identical to the SA520, but is designed to sit over or under a TV or against the wall

*a really compact
loudspeaker with a
really big sound*

*the little SA505 is not much bigger than
the palm of your hand. The sound it
delivers however can fill a large room*

compact and versatile

SA510 is a unique and versatile compact loudspeaker with an amazingly big sound. Hang it on the wall, suspend it from the ceiling or stand it on the floor. There is a range of accessories to suit every position. Also available as a center channel speaker called SA510AV.

The SA510 is a classic representative for SA's technology because it clearly demonstrates how much sound a compact loudspeaker can produce. It is equally suited for playing all types of music as it is for recreating the sounds that bring your home cinema to stunning life. And with its magnetic shielding, the SA510 can safely be placed close to your TV.

Technical description

is identical to the SA510,
but is designed to sit over or under a TV
or against the wall*

so much sound from such a little loudspeaker

The SA505 is a surprisingly small loudspeaker that delivers the genuine SA sound. It can be placed virtually anywhere and can be used with a quality system for both music and home cinema entertainment.

The SA505 lets you fill your room with sound - not sound equipment. It is much more powerful than it looks and being magnetically shielded, it can be placed close to your TV.

Technical description

- Extremely fast drive units
- Magnetic shielding
- 2 way design
- Mechanically stable cabinet
- Real wood (Maple, Cherry or Black Ash) finish

Options for positioning of SA510/SA510AV and SA505

- On the wall with the bracket WB1
- From the ceiling with the bracket CB1
- On the floor with the stand FS1

The SA510 and SA505 are ideal

- In a sound system for all forms of music
- As a front speaker in a home cinema
- As the rear speaker in a home cinema
- With an active subwoofer (SE175 or SE200) in a sound system

The SA510AV is ideal

- As a center channel speaker in a home cinema

the SubElectro 200 is an active subwoofer that distinguishes itself from the rest by offering a very precise bass reproduction, while at the same time being an attractive piece of furniture

hyper-active subwoofers

The SA SubElectro series breaks the traditions that define subwoofers. Here you can experience the true meaning of speed and precision that ensures your bass is never boomy, but always sounds deep and clear.

The two active subwoofers in the SubElectro series are remarkably versatile, and are specially designed to reproduce low frequencies. This makes them ideal for home cinemas where they add energy and drama to your viewing experience. What is really unusual is that they can also be used in a music sound system where they add a deeper and more precise bass than ordinary loudspeakers – even those that are really big.

power and grace

Everyone knows the problems of rumbling bass from active subwoofers.

The sound becomes distorted making it difficult to distinguish individual sounds. The important elements in the sound disappear and the different instruments all sound the same.

Thanks to its speed and precision, that's not the case with the SA Sub-Electro series.

The built-in amplifier features a massive power supply, enabling it to deliver really huge effects. The woofer's magnet is at least twice as big as those used in ordinary active subwoofers. The cabinet is made from 25 mm finished MDF to ensure optimal stability. The front and the bottom of the cabinet are also reinforced in thickness (35 and 50 mm respectively).

This combination of great stability, massive amplifier effect and great control over the bass loudspeakers membrane movement produces an unbelievable energy and precision that is easy to integrate into the sound from your other loudspeakers.

380 Watts at your disposal ...

SubElectro 200 – easy to integrate into a home cinema or a sound system

Despite its diminutive size, the SubElectro is a powerful active subwoofer with unique capacity for matching a room's acoustics.

You will never run dry for power with an SA SubElectro. Instead you'll experience a powerful and potent reproduction of deep bass. The round plate under the cabinet isn't just an elegant design element. The plate can turn, changing the subwoofer from bass reflex into a sealed chamber. This simple, yet unique concept lets you adjust the SubElectro to suit rooms with difficult acoustics.

Technical description

- Built-in high quality class A/B amplifier
- Unique capacity to accommodate individual room acoustics
- Special bass boost function for home cinemas
- High Output with option for filtering out deep tones in the front speakers
- Variable sub crossover from 40-160 Hz
- Input: line in (mono or stereo) or high input direct from loudspeaker output on your amplifier
- Volume control for adjusting sound level
- On/off function that automatically turns on and off
- Output: line out (mono or stereo)
- Power connection: 230 or 115 Volt
- Phase: 0 or -180 degrees
- Real wood finish (Maple, Cherry or Black Ash)

SubElectro 200

SubElectro 175

sound plays a leading role in films

Now you can enjoy better sound at home than you've ever heard in the cinema.

The soundtrack of a film contains so much more than just the actors' dialogue. A major part of the film's effect is created by the music, while the drama is enhanced by special sound effects. Creating a home cinema lets you experience the action with even greater intensity. That's why you need front speakers, a center channel speaker, rear speakers and an active subwoofer for optimal results.

choose SA for your home cinema

The sound quality from SA loudspeakers makes it easy to understand every nuance of what the actors are saying. The film music emerges natural and alive, and there is ample power for those exciting special effects. First class sound for your home cinema is essential if you want to get the most out of the films you see.

all compact SA loudspeakers are prepared for use with our specially designed accessories. This photo shows the SA710 on the FS1 stands

matching accessories

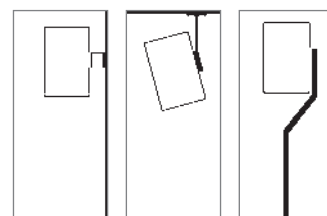

You can place a compact loudspeaker just about anywhere. SA has made it easy to benefit from this freedom because all our compact loudspeakers are prepared from use with either wall or ceiling brackets or floor stands.

FS1
Floor stands. The cable to the speakers runs through the stand that is 90 cm high. Adjustable feet or spikes. Delivered in pairs. Metallic paintwork.

CB1
Ceiling bracket that angles the loudspeakers 15 degrees downwards. 30 cm long. The loudspeaker cable runs through the bracket. Delivered in pairs. Metallic paintwork.

WB1
Adjustable wall bracket. Delivered in pairs.

SPK1
Eight 8 mm spikes for floor speakers.

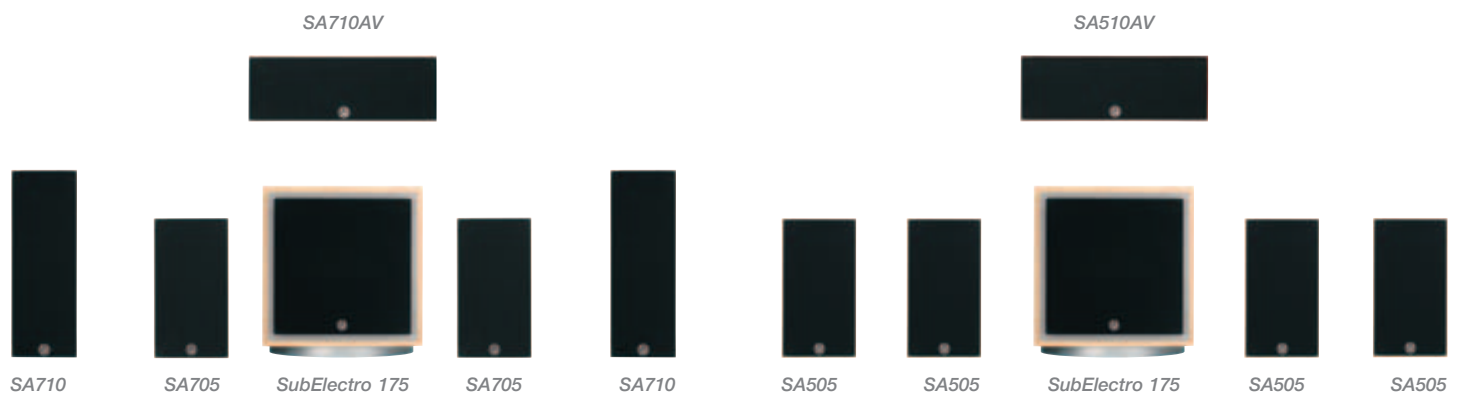

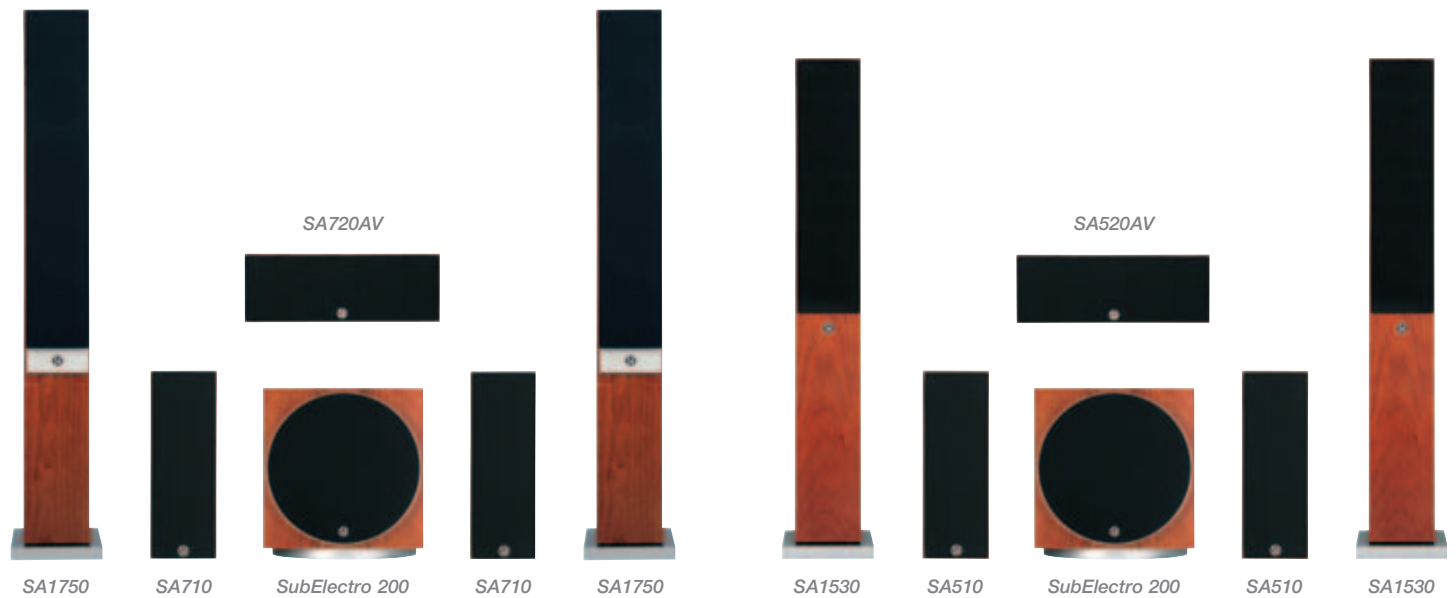

adjust your cinema to your taste

All SA loudspeakers can be used in a home cinema system. That's why we give you the freedom to make your own choice when you set it up.

Should the loudspeakers stand on the floor, hang on the wall or something totally different? Are all the loudspeakers available in the same real wood finish? Is there a solution that matches your exact needs? Relax – all the hard work has been done.

We offer more than 100 combinations when you set up a home cinema with SA. This makes it easy to transform your dreams into living reality. Here are four examples.
