*People say we make  
the best loudspeakers*

### **System Audio 1050**

The 1050 is the Flagship of the System Audio 1000 series. It reproduces all types of music with precision and natural richness and is easily matched to any home environment. The technology in the 1050 is based around light weight driver membranes that respond precisely to the music giving

### **System Audio 1030**

The 1030 proves that superior design and technology makes it possible to reproduce big sound from compact loudspeakers. It captures the magic of any kind of music and will give you musical enjoyment for many years to come. At the bottom of the cabinet is a sealed chamber designed for

...ing that center channel speaker are high quality, gold plated, biwiring terminals.

... musical sound. At the bottom of the cabinet is a sealed chamber designed for filling with sand. On the back are high quality, gold plated, biwiring terminals.

### System Audio 1010

The 1010 is designed for the person who demands big sound from a compact loudspeaker. 1010 matches all kinds of Hi Fi systems and clearly creates musical improvement when compared to ordinary loudspeakers. It reproduces all types of music with fantastic power and musical engagement.

### System Audio 1005

The 1005 is the best mini loudspeaker on the market. 1005 is easy to install on any Hi Fi system and has the ability to create big sound with extraordinary authenticity. You will be amazed at how far System Audio technology has carried the concept of big sound and musical accuracy.

### System Audio 1000 AV

The 1000 AV center channel speaker can be combined with any System Audio speakers to complete a Home Theater system. The sound of the 1000 AV is made to match the sonic precision of our other models so you can freely choose which models you want as your front and rear speakers. The special design of the coaxial drive unit gives the 1000 AV a sound dispersion with the same characteristics as the human voice which is extremely important for the center channel signal.

#### Technical specifications: System Audio 1050

Power handling:	150 Watts
Impedance:	4 Ohms
Frequency response (+/-4 dB):	35-22,000 Hz
Sensitivity (1W, 1m):	91 dB
Speaker principle:	2-way D'Appolito / Bass reflex
Crossover Frequency:	3000 Hz / High Slope
Dimensions (WxHxD) cm:	16.5 x 96.6 x 27
Finish:	Black ash or rosewood
Biwiring:	Yes
Sand chamber:	Yes

#### System Audio 1030

Power handling:	125 Watts
Impedance:	8 Ohms
Frequency response (+/-4 dB):	40-22,000 Hz
Sensitivity (1W, 1m):	89 dB
Speaker principle:	2-way / Bass reflex
Crossover Frequency:	3000 Hz / High Slope
Dimensions (WxHxD) cm:	16.5 x 91.6 x 22.5
Finish:	Black ash or rosewood
Biwiring:	Yes
Sand chamber:	Yes

#### Technical specifications: System Audio 1010

Power handling:	90 Watts
Impedance:	8 Ohms
Frequency response (+/-4 dB):	45-22,000 Hz
Sensitivity (1W, 1m):	89 dB
Speaker principle:	2-way / Bass reflex
Crossover Frequency:	4000 Hz / High Slope
Dimensions (WxHxD) cm:	16.5 x 35 x 21.1
Finish:	Black ash or rosewood
Biwiring:	Yes

#### System Audio 1005

Power handling:	80 Watts
Impedance:	8 Ohms
Frequency response (+/-4 dB):	50-22,000 Hz
Sensitivity (1W, 1m):	88 dB
Speaker principle:	2-way / Bass reflex
Crossover Frequency:	4000 Hz / High Slope
Dimensions (WxHxD) cm:	16.5 x 29 x 21.1
Finish:	Black ash or rosewood
Biwiring:	Yes

#### System Audio 1000 AV

Power handling:	80 Watts
Impedance:	4 Ohms
Frequency response (+/-4 dB):	55-22,000 Hz
Sensitivity (1W, 1m):	88 dB
Speaker principle:	2-way / Bass reflex
